Contents of Volume 81

Number 1, 7 November 1979

KOZLOV, A. P., Evolution of Living Organisms as a Multilevel Process 1

SCOTT, J. E., Hydrated Electrons and Prebiotic Evolution . . . 19

LAPLANTE, J.-P., Inhomogeneous Steady State Distributions of Species in Predator–Prey Systems. A Specific Example . . 29

GOULD, G. W. and DRING, G. J., On a Possible Relationship between Bacterial Endospore Formation and the Origin of Eukaryotic Cells 47

STAUFFER, H. B., A Derivation for the Weibull Distribution . . 55

BARNARD, C. J. and BURK, T., Dominance Hierarchies and the Evolution of "Individual Recognition" 65

JONES, M. N. and PERRY, R., The Kinetics of Cellular Aggregation Induced by Turbulent Flow 75

ROBINSON, J. V. and VALENTINE, W. D., The Concepts of Elasticity, Invulnerability and Invadability 91

MANDECKI, W., A Kinetic Model for Interaction of Regulatory Proteins and RNA Polymerase with the Control Region of the *lac* Operon of *Escherichia coli*. 105

ERLICH, P. H., The Effect of Multivalency on the Specificity of Protein and Cell Interactions 123

MITTENTHAL, J. E., A Model for the Genetic Control of Differential Adhesion in Insect Epidermis 129

Number 2, 21 November 1979

HEATH, D. J., Brooding and the Evolution of Hermaphroditism . 151

SAUVE, R. and OHKI, S., Interactions of Divalent Cations with Negatively Charged Membrane Surfaces. I. Discrete Charge Potential . 157

WHITE, R. A., RASMUSSEN, S. L. and THAMES, JR., H. D., State Vector Models of the Cell Cycle III: Continuous Time Cell Cycle Models 181

BRODA, E. and PESCHEK, G. A., Did Respiration or Photosynthesis Come First? 201

DATALAN, J. and PEREZ, P., Photoinduced Double Proton Transfer in a Model Hydrogen Bonded Base Pair. Theoretical Study . . 213

MICHOD, R., Genetical Aspects of Kin Selection: Effects of Inbreeding 223

MEDINA, J. R. and PETIT, C., L'effet Hitch-hiking comme Processus Dispersif 235

SIMON, I., Investigation of Protein Folding: Uneven Distribution of Point Mutations along Polypeptide Chains 247

KIRKMAN, H. N., Rectification of Tandemly Repetitious DNA. I. Influences on Rate 259

KIRKMAN, H. N., Rectification of Tandemly Repetitious DNA. II. Clustering and Periodicity 275

THOMPSON, R. W. and CAULEY, D. A., A Population Balance Model for Fish Population Dynamics 289

JEAN, R. V., Some Consequences of the Hierarchical Approach to Phyllotaxis 309

LEVY, H. M., RAMIREZ, F. and SHUKLA, K. K., Muscle Contraction: a Mechanism of Energy Transduction 327

SHINAGAWA, Y., Note on the Validity of Constant Field Assumption in Relation to the Exact Solution of Nernst–Planck Equations . 333

BRACKENBURY, J. H., Aeroacoustics of the Coval Organ of Birds . 341

BELL, A. D., ROBERTS, D. and SMITH, A., Branching Patterns: the Simulation of Plant Architecture 351

Number 3, 7 December 1979

OLSON, K. R., The Linear Cable Theory as a Model of Gill Blood Flow 377

SCHAKENBERG, J., Simple Chemical Reaction Systems with Limit Cycle Behaviour 389

SMYTHIES, J. R., The Possible Molecular Structure of Binding Sites for Tumor-promoting Phorbol Esters, 2′-Deacyl Phospholipids and PGE_1 on the Molecules of Phospholipase A_2 401

TAYLOR, P. D., An Analytical Model for a Short-term Advantage for Sex 407

SCOTT, P. D., Conditional Control Transfer Mechanisms in the Neocortex: I. The Basic Model 423

SCOTT, P. D., Conditional Control Transfer Mechanisms in the Neocortex: 2. Cytoarchitectural and Electrophysiological Evidence and Predictions 453

LAUFFENBURGER, D. and KELLER, K. H., Effects of Leukocyte Random Motility and Chemotaxis in Tissue Inflammatory Response 475

KOONS, S. J. and ZOBEL, C. R., A Modified Distance Variable for the Hill Formalisation for Kinetic Models of Muscle Contraction . 505

SILVER, F. H. and TRELSTAD, R. L., Linear Aggregation and the Turbidimetric Lag Phase: Type I Collagen Fibrillogenesis *In Vitro* 515

FRIEDRICH, P., On the Physiological Significance of Positive and Negative Cooperativity in Enzymes 527

BREMER, H., CHURCHWARD, G. and YOUNG, R., Relation Between Growth and Replication in Bacteria 533

BEACH, K. W., A Theoretical Model to Predict the Behaviour of Glycosylated Hemoglobin Levels 547

ELDER, D., Why is Regenerative Capacity Restricted in Higher Organisms? 563

TREHUB, A., Associative Sequential Recall in a Synaptic Matrix . 569

ORLOVE, M. J., A Reconciliation of Inclusive Fitness and Personal Fitness Approaches: A Proposed Correcting Term for the Inclusive Fitness Formula 577

BLANQUET, P. R., Effect of Charge Changes in Ligand-triggered Membrane Cooperative Transitions 587

KEEN, R. and PARKER, D. L., Determining Expected Duration of Development under Conditions of Alternating Temperatures . 599

LETTERS TO THE EDITOR

HOFBAUER, J., SCHUSTER, P. and SIGMUND, K., A Note on Evolutionary Stable Strategies and Game Dynamics . . 609

MARSHALL, E. A., On the Exact Analytical Solution of the Poisson-Boltzmann Equation 613

MANILOFF, J., Mycoplasm Gliding may be a Biased Brownian Motion 617

Number 4, 21 December 1979

MANGOUBI, S. S. and ZEEVI, Y. Y., Theoretical Analysis of Photoreceptor Noise 621

CHEN, Y-D., On the Admittance of Membranes Associated with Channel Conduction, Application to Channels at Non-equilibrium Steady State 633

LETTER TO THE EDITOR

MURAKAMI, H. and MORI, H., On the Coding and Origins of t and T Antigens in SV40 809

Index to Volume 81

Adhesion, differential, in insect epidermis, a model for the genetic control of, 129
Admittance of membranes associated with channel conduction; application to channels at non-equilibrium steady state, 633
Aeroacoustics of the coval organ of birds, 341
Aggregation, cation-induced, of chromaffin granule membranes, short and long-range forces involved in, 713
Aggregation, linear, and the turbidimetric lag phase: type I collagen fibrillogenesis *in vitro*, 515
Antibody repertoire size, minimal, and reliability of self–non-self discrimination; theoretical studies of clonal selection, 645
Antigens t and T in SV40, on the coding and origins of (letter), 809
Arterial wall, transport of macromolecules across, in the presence of local endothial injury, 685
Associative sequential recall in a synaptic matrix, 569

Bacteria, relation between growth and replication in, 533
Bacterial endospore formation and the origin of eukaryotic cells, on a possible relationship between, 47
BARNARD, C. J. and BURK, T., Dominance hierarchies and the evolution of "individual recognition", 65
BASS, L. and ROBINSON, P., How small is the functional variability of liver sinusoids?, 761
BEACH, K. W., A theoretical model to predict the behaviour of glycosylated hemoglobin levels, 547
BELL, A. D., ROBERTS, D. and SMITH, A., Branching patterns: the simulation of plant architecture, 351
Binding sites for tumor-promoting phorbol esters, 2′-deacyl phospholipids and PGE_1 on the molecules of phospholipase A_2, the possible molecular structure of, 401
Birds, aeroacoustics of the coval organ of, 341
BLANQUET, P. R., Effect of charge changes in ligand-triggered membrane cooperative transitions, 587
BRACKENBURY, J. H., Aeroacoustics of the coval organ of birds, 341
Branching patterns: the simulation of plant architecture, 351
BREMER, H., CHURCHWARD, G. and YOUNG, R., Relation between growth and replication in bacteria, 533
BROADA, E. and PESCHEK, G. A., Did respiration or photosynthesis come first?, 201
Brooding and the evolution of hermaphroditism, 151
Brownian motion, biased, mycoplasm gliding may be a (letter), 617
BURK, T. (see BARNARD, C. J.), 65

Catalysis: experimental designs for estimating the kinetic parameters for enzyme-catalysed reactions, 671
Cation-induced aggregation of chromaffin granule membranes, short and long-range forces involved in, 713
Cations, divalent, interactions with negatively charged membrane surfaces: discrete charge potential, 157
CAULEY, D. A. (see THOMPSON, R. W.), 289
Cellular aggregation induced by turbulent flow, the kinetics of, 75
Cell cycle, state vector models of; continuous time cell cycle models, 181
Cell and protein interactions, the effect of multivalency on the specificity of, 123
Cells, eukaryotic, on a possible relationship between bacterial endospore formation and the origin of, 47
Channel conduction, on the admittance of membranes associated with; application to channels at non-equilibrium steady state, 633
Charge change effects in ligand-triggered membrane cooperative transitions, 587
Chemical reaction systems with limit cycle behaviour, 389
Chemotaxis, effects of leukocyte random motility and, in tissue inflammatory responsem 475
CHEN, Y-D., On the admittance of membranes associated with channel conduction, applicable to channels at non-equilibrium steady state, 633
Chromaffin granule membranes, short and long-range forces involved in cation-induced aggregation of, 713
CHURCHWARD, G. (see BREMER, H.), 533
Clonal selection, theoretical studies of; minimal antibody repertoire size and reliability of self–non-self discrimination, 645
Clustering and periodicity; rectification of tandemly repetitious DNA, 275
Coding and origins of t and T antigens in SV40 (letter), 809
Collagen type I fibrillogenesis *in vitro*; linear aggregation and the turbidimetric lag phase, 515
Cooperative transitions, membrane, ligand-triggered, effect of charge changes in, 587
Cooperativity, positive and negative, in enzymes, on the physiological significance of, 527
Coval organ of birds, aeroacoustics of, 341

DATALAN, J. and PEREZ, P., Photoinduced double proton transfer in a model hydrogen bonded base pair. Theoretical study, 213
2′-Deacyl phospholipids, PGE_1 and phorbol esters, the possible molecular structure of binding sites on the molecules of phospholipase A_2, 401
Development under conditions of alternating temperature, determining expected duration of, 599
DNA information content and evolution, 803
DNA, tandemly repetitious, rectification of; clustering and periodicity, 275
DNA, tandemly repetitious, rectification of; influences on rate, 259
Dominance hierarchies and the evolution of "individual recognition", 65
DRING, G. J. (see GOULD, G. W.), 47
DUGGLEBY, R. G., Experimental designs for estimating the kinetic parameters for enzyme-catalysed reactions, 671

Elasticity, invulnerability and invadability, the concepts of, 91
ELDER, D., Why is regenerative capacity restricted in higher organisms?, 563
Electrons, hydrated, and prebiotic evolution, 19
Endothial injury, local, transport of macromolecules across arterial wall in the presence of, 685
Energy transduction mechanism in muscle contraction, 327
Enzyme-catalysed reactions, experimental designs for estimating the kinetic parameters for, 671
Enzymes, on the physiological significance of positive and negative cooperativity in, 527
Epidermal cell columns in mammalian skin, estabilshment of; computer simulation, 745
Epidermis, insect, a model for the genetic control of differential adhesion in, 129
ERLICH, P. H., The effect of multivalency on the specificity of protein and cell interactions, 123
Escherichia coli, a kinetic model for interaction of regulatory proteins and RNA polymerase with the control region of the *lac* operon of, 105
Eukaryotic cell formation, on a possible relationship between bacterial endospore formation and, 47
Evolution and the information content of DNA, 803
Evolution of hermaphroditism, and brooding, 151
Evolution of "individual recognition", and dominance hierarchies, 65
Evolution of living organisms as a multilevel process, 1
Evolution, prebiotic, and hydrated electrons, 19
Evolutionary stable strategies and game dynamics, a note on (letter), 609

Fibrillogenesis, type I collagen, *in vitro*; linear aggregation and the turbidimetric lag phase, 515
Fish population dynamics, a population balance model dor, 289
Fitness: a reconciliation of inclusive fitness and personal fitness approaches; a proposed correcting term for the inclusive fitness formula, 577
Folding, protein: uneven distribution of point mutations along polypeptide chains, 247
Forces, short and long-range, involved in cation-induced aggregation of chromaffin granule membranes, 713
FRIEDRICH, P., On the physiological significance of positive and negative cooperativity in enzymes, 527

Game dynamics and evolutionary stable strategies, a note on (letter), 609
Genetic control of differential adhesion in insect epidermis, a model for, 129
Genetical aspects of kin selection: effects of in-breeding, 223
Gill blood flow, the linear cable theory as a model of, 377
Glycosylated hemoglobin levels, a theoretical model to predict the behaviour of, 547
GOULD, G. W. and DRING, G. J., On a possible relationship between bacterial endospore formation and the origin of eukaryotic cells, 47
GREEN, H. S. (see VACCARO, S. R.), 771
Growth and replication in bacteria, relation between, 533

HAMID, Z. (see RAO, G. S.), 803
HAYNES, D. H., KOLBER, M. A. and MORRIS, S. J., Short and long-range forces involved in cation-induced aggregation of chromaffin granule membranes, 713
HEATH, D. J., Brooding and the evolution of hermaphroditism, 151
Hemoglobin, glycosylated, a theoretical model to predict the behaviour of levels of, 547
Hermaphroditism, brooding and the evolution of, 151
Hierarchical approach to phyllotaxis, some consequences of, 309
Hill formalization for kinetic models of muscle contraction, a modified distance variable for, 505
Hitch-hiking, l'effet comme processus dispersif, 235
HOFBAUER, J., SCHUSTER, P. and SIGMUND, K., A note on the evolutionary stable strategies and game dynamics (letter), 609
HONDA, H., MORITA, T. and TANABE, A., Establishment of epidermal cell columns in mammalian skin: computer simulation, 745
Hydrated electrons and prebiotic evolution, 19
Hydrogen bonded base pair, photoinduced double porton transfer in a model; a theoretical study, 213

In-breeding effects: genetical aspects of kin selection, 223
"Individual recognition", dominance hierarchies and the evolution of, 65
Inflammatory response, tissue, effects of leukocyte random motility and chemotaxis in, 475
Information content of DNA and evolution, 803
Insect epidermis, a model for the genetic control of differential adhesion in, 129
Invadability, elasticity and invulnerability, the concepts of, 91
Invulnerability, invadability and elasticity, the concepts of, 91
Ionic processes in excitable membranes, 771
